

MAMMOTH FOR BANKS

Digital assets. Your banking experience.

Digital asset infrastructure designed to fit within the bank's own application.

- 01 Bank-selected offering and rollout
- 02 Reusable interfaces and selected integrations
- 03 Clear responsibilities from intent to outcome

Intended product model. Capabilities and readiness are assessed for the selected bank deployment.

THE OPPORTUNITY

Start with the bank's customer.

Make the intended investment journey understandable within a familiar banking environment.

- 01 Discover eligible products
- 02 Review the action and relevant costs
- 03 Authorise and follow the confirmed result

THE OFFERING

Four modules. A defined scope.

Select the capabilities that fit the bank's intended offering.

- 01 Wallets, funding and spot investing
- 02 Conditional orders and recurring purchases
- 03 Isolated perpetuals
- 04 Collateralised borrowing

INSIDE YOUR BANK'S APP

A complete customer journey.

The normal lifecycle is intended to stay within the bank application.

- 01 Discover and explore
- 02 Fund and review
- 03 Authorise and track
- 04 See holdings and transaction records

OPERATING MODEL

Know who does what.

Keep product decisions and technical responsibilities explicit.

- 01 Bank: customers, eligibility, offering, fiat and integration
- 02 Customer: review and applicable authorisation
- 03 Mammoth: interfaces, integrations, validation and reconciliation
- 04 Providers: execution and their applicable rules

DELIVERY

A practical integration path.

Agree scope, dependencies and milestones before promising a timeline.

- 01 Evaluate the initial offering
- 02 Design interfaces and responsibilities
- 03 Integrate into the bank's systems
- 04 Validate and plan the controlled rollout

BANK EVALUATION

Evidence before assumptions.

Review the evidence relevant to the selected product and operating model.

- 01 Product and provider scope
- 02 Control model and operational responsibilities
- 03 Integration and exception testing
- 04 Applicable assurance and readiness evidence

MAMMOTH · LONDON

Define what comes next.

Discuss the products, responsibilities and integration path that fit your bank.

- 01 Bring your intended products and customer groups
- 02 Describe your systems and delivery context
- 03 Agree the requirements for a focused evaluation
